

Seascapes Workshop, Agenda

Saturday, March 15th

APFD meeting participants arrive in Maui, shortly after transportation will take you directly to the workshop venue

Sunday, March 16th

APFD participants: APFD meeting, details to come

Seascape Workshop attendees: Arrive in Maui, shortly after transportation will take you directly to the workshop venue

Monday, March 17th

Session 1: Welcome remarks and introductions

Session 2: Updates from the field

Tuesday, March 18th

Session 3: Capacity Building: Sharing Lessons Learned

Wednesday, March 19th

Session 4: Supply Chains and Market Linkages in Fisheries

Thursday, March 20th

Morning Session: Field Trip, details to come

Afternoon Session: Free for meetings

Friday, March 21st

Session 5: TBD

Session 6: Speed dating (a series of small group meetings between the field teams and experts on a variety of topics)

Saturday, March 22nd

Depart from the Royal Lahaina Resort for the Maui airport

Supply Chains and Market Linkages in Fisheries

CI's work aims to achieve human wellbeing benefits from more sustainable management of natural capital. Fisheries provide livelihoods and food for over a billion people worldwide, including some of the world's poorest people. Although much of our work to date has focused on improving the sustainability of fish catches with the aim of increasing future catch *amounts*, we can also enhance livelihoods by increasing the *value* received by fishers for their catch. This session will focus on projects (existing or potential), which seek to increase this value, particularly when this can be linked to explicit sustainability objectives.

Preparation required beforehand:

To guide the brainstorming and learning session, a table will be sent out to fill in.

Possible agenda:

- Overview of the fisheries component of the Global Ag + Fisheries Sector
- Jack Kittinger speaks about the Hawaii fisheries supply chain
- Panel Discussion to discuss supply chains and market linkages
- Breakout groups discussions
- Overview of CI's work on supply chains to date and identification of objectives of the breakout groups
- Present team outcomes, identify next steps

Outcomes:

- Document that consolidates work already being done
- General increased understanding and awareness of this type of work and the solutions available
- A list of partners to work with (existing and potential)
- Proposed ways in which CI could/should engage in this issue; tools, opportunities, leverage points

Capacity Building: Sharing Lessons Learned

Capacity building is a fundamental component of marine resource management that every one of our marine teams globally is engaged in to varying degrees. However, much of this work is done in isolation and may or may not be part of a comprehensive capacity development strategy for each region. With this session, we will discuss capacity building lessons learned from the field—achievements, successful strategies, and obstacles—with the aim of exposing each other to new models, materials, and approaches and to increase coordination and exchange between our field teams. Additionally, a focus will be placed on what our niche, as an organization, can and should be for marine management capacity building globally.

Preparation required beforehand:

To guide the brainstorming and learning session, a table will be sent out to fill in.

Possible agenda:

- Anne Walton, from NOAA, presents on International MPA Capacity Building Program
- Case Study: Capacity Building in Indonesia
- Panel Discussion:
- Overview of CI's marine capacity building activities and tools
- Breakout group discussion
- Moderated discussion: ways to have more effective coordination and exchanges and CI's future niche in capacity building
- Present team outcomes, identify next steps

Outcomes:

- List of available capacity building resources developed and used across the CI's marine teams
- Draft framework for a CI marine capacity building learning network/coordination mechanism, including list of key capacity builders and partners from each region
- Draft strawman for a capacity building strategy/niche for CI Marine, including list of essential partners
- Follow-up actions with assigned responsibility
